#### **Course Description:**

An introduction to accounting to enable the student to achieve a working knowledge of accounting and its uses. Emphasis is placed on the vocabulary, methods, and processes used in business transactions. Learning to understand and interpret corporate financial reports is fundamental to a solid business education. Students will learn how the economic transactions of a firm are reported in the financial statements and related disclosures. The goals of the course are to provide students with a basic set of skills that can be used to read and analyze financial statements.

#### **Course Goals:**

This course is the first of two introductory college level accounting courses designed to help the student understand and use financial information in making business decisions. At the end of the course, students will:

- Understand how transactions affect financial statements;
- Be proficient in basic transaction processing methodology;
- Be able to identify the components of financial statements;
- Understand the differences between accrual income versus cash flow;
- Be familiar with basic accounting terminology;

- Be able to perform selected rigorous business and accounting calculations;
- Know the importance of integrity in financial accounting and reporting;
- Have been exposed to basic accounting issues relating to global business activities;
