Course Description:

This course is an introduction of microeconomics. General economics study consists of two parts: macroeconomics and microeconomics. Microeconomics studies the behaviors of individuals, households and firms. The main concern of microeconomics is the efficient allocation of scarce resources between alternatives. Economic agents use market system to determine prices to allocate scarce resources. More specifically, we will learn how individuals behaves to maximize her utility subject to the budget constraint, and firms maximize its profit, and the whole society attempts to allocate scarce resources more efficiently.

This course consists of 4 sessions of 120 minutes each per week for 4 weeks. This course is very intensive and covers course content equivalent to one regular semester three credit course in U.S. university.

By the end of the course, you should feel comfortable to use microeconomics terminology, and use graphics to analyze contemporary microeconomic issues.

Textbook:

1. Principles of Microeconomics, 7th ed., Gregory. Mankiw, CENGAGE Learning, 2015
2. Lecture slides will be provided in the class.

Grading:

There will be one midterm exam and one final exam, 40 points each. Exams test basic economic theory and its applications. Homework accounts 20 points. There is 15 extra points for attendance.

Attendance:

Students should attend class regularly, arrive on time and not leave early. While you are in class, show the proper respect to your instructor and to your classmates. When you must miss a class, it is your responsibility to get the class material from me or your classmates. Class attendance will be checked. You will earn maximum 15 points for attendance for the final grade. Late arrival and excused absence will cost 0.5 point. Excessive absence may result in the course grade of "F".
