Class Hours:

This course will have 52 class hours, including 32 lecture hours, professor 8 office hours, 8-hour TA discussion sessions, 4-hour review sessions.

Course Description:

This course addresses the main analytical concepts and theoretical debates surrounding the globalization of markets. While the course focuses on the economic dimension of globalization, it also touches upon its broader sociological and political implications. The following topics will be discussed: a historical account of the expansion of markets; basic trade economics models; factor market mobility; trade policy and trade liberalization; the globalization of financial markets; free trade agreements; and the role of the international organizations.

Course Objectives:

The course intends to empower students with theoretical underpinnings of globalization and help them develop a capacity to critically evaluate globalization from an economic perspective. Students will understand the nature of economic globalization and the forces that drive it, such as trade, labor mobility, technological flow and international capital flows. They will also learn about data sources to examine the direction, impact and magnitude of economic globalization
