Course Description:

This course is an introduction of microeconomics. General economics study consists of two parts: macroeconomics and microeconomics. Microeconomics studies the behaviors of individuals, households and firms. The main concern of microeconomics is the efficient allocation of scarce resources between alternatives. Economic agents use market system to determine prices to allocate scarce resources. More specifically, we will learn how individuals behave to maximize her utility subject to the budget constraint, and firms maximize its profit, and the whole society attempts to allocate scarce resources more efficiently.

This course consists of 4 sessions of 120 minutes each per week for 4 weeks.

By the end of the course, you should feel comfortable to use microeconomics terminology, and use graphics to analyze contemporary microeconomic issues.

Textbook:

1. Principles of Microeconomics, 7th ed., Gregory. Mankiw, CENGAGE Learning, 2015
2. Lecture slides will be provided in the class.
