Course Description

This course is designed to help the student effectively learn financial statement analysis and be able to apply them to real world examples while thinking like a financial analyst. Financial analysts must possess an in-depth understanding of the creation and composition of financial statement, as well as the ability to appropriately interpret the relevant notes and disclosures contained therein. Students will obtain an in-depth understanding not only of the composition of the financial statements, but the fundamental accounting concepts that are the foundation of financial reporting. The course will expose students to in-depth accounting topics.
